The Volati Group

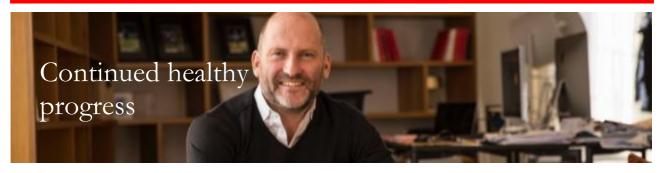

¹⁾ EBITA excl. items affecting comparability is calculated excluding nonrecurring items, such as listing expenses and earn-out revaluations.

Comments from the CEO

Volati continued to progress favourably in the first quarter. Our business units trended positively and delivered organic EBITA growth of around 10% in the quarter and posted a total LTM EBITA of SEK 320m. Net profit after tax rose substantially during the quarter due to the considerable reduction in our financing costs following the new share issue at the end of last year, which explains the sharp rise in earnings per share. As we have described previously, the capital raised also results in an initial decline in the return on equity until we have set the capital to work through new acquisitions.

In the Consumer Business Area, it was particularly pleasing to note the positive effect in the first quarter on Besikta of the acquisition of ClearCar in the spring of 2016, which has significantly exceeded our expectations. The Industry Business Area has declined slightly during the quarter, primarily because of the positive earnings impact for Corroventa in the corresponding year earlier period due to the winter flooding, mainly in the UK. The businesses in the Trading Business Area posted stable results for the quarter in a slightly weaker market.

Evaluating numerous acquisition possibilities

We are continuing to build Volati according to our own approach — to support business units with their development and to search in a structured manner for new companies to complement the Group. We evaluate a considerable number of new companies each year to identify the acquisition category that suits Volati: stable businesses with healthy cash flows that we can acquire at reasonable valuations. Our perception is that the acquisition multiples, particularly for larger companies, remains generally high. In this market, it is important to focus on doing the right things and remaining true to our defined acquisition principles.

For us, this means continuing to do what we have done so successfully for the last 14 years. We continuously evaluate interesting acquisition objects and, to date, we have looked at some 60 companies of which a number are undergoing continued evaluation. We have a proven business model and know that opportunities will arise to acquire good companies at reasonable valuations. However, one of Volati's core principles is that we would rather turn down a good deal than risk making a bad one.

We have historically acquired companies at a weightedaverage EV/EBITDA multiple of 5.8. These companies share several qualities: they have proven business models, leading market positions and strong cash flows. However, they are seldom growth companies, at least not at the time when we acquire them. Yet we have still grown rapidly as a Group by reinvesting cash flows from existing operations in new acquisitions in parallel with succeeding to grow mature companies organically.

Focus on long-term performance

Volati has business units in various industries and markets, and these units' sales and earnings trends are impacted by a number of different factors — from seasonal variations and market activities to investments that we implement today to build robust and profitable operations for tomorrow. This means focusing on control and evaluation of the businesses over time, which is where we have a strong track record. For example, since 2013, Volati has generated an average annual organic growth in net sales of 4% and in EBITA of 14% per year.

Volati creates an environment in which good companies improve over time through a focus on value creation, skilled employees, knowledge sharing and disciplined capital allocation. The development of the vehicle inspection operation Besikta is a typical example of how Volati thinks and works, and how we view the long-term potential of a business. Since the acquisition in 2013, Volati has worked methodically with the new management to build an operation with high quality and a strong brand that is now the second largest company in the Swedish vehicle inspection market.

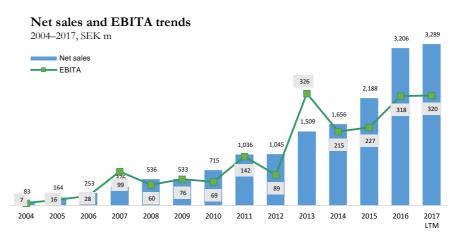

It is fantastic to continue building Volati in 2017 with so many positive preconditions in place. We have stable, profitable businesses that generate healthy cash flows, and with healthy cash funds we look forward to acquiring more good companies at the right prices and at the right moment.

Mårten Andersson, CEO

About Volati.

Volati is a Swedish industrial group that acquires companies with proven business models, leading market positions and strong cash flows at reasonable valuations, and develops these with an emphasis on long-term value creation. Volati's corporate-development strategy is based on retaining the entrepreneurial spirit of companies and supplementing leadership, expertise, processes and financial resources. Identifying growth potential and improving cash flows is of great importance.

Since 2003, Volati has built an industrial group that, at the end of the first quarter of 2017, comprised some 12 business units with around 40 operating companies that were organised under the three business areas; Trading, Consumer and Industry. Volati has operations in 16 countries and a total of 1,172 employees. The financial trend since the start of operations is presented in the adjacent diagram.

Financial targets

Volati's overriding objective is to generate long-term increases in value by building an industrial group of profitable companies with solid cash flows and the capacity for continuous development. Volati's Board has adopted the following financial targets, which should be evaluated as a whole.

Earnings growth: Volati's target is to reach an adjusted EBITA¹ of SEK 700m by the end of 2019. The target for average annual organic EBITA growth is 5%. In the first quarter of 2017, adjusted EBITA grew 2% (calculated as if we had owned the current company for the entire quarter and the comparative period) and organic EBITA growth was 10% for the same period. The deviation between adjusted EBITA and organic EBITA pertained to ClearCar, which was loss making in the first quarter of 2016, and which was included in adjusted EBITA, while the positive effect of the profitability enhancements following the acquisition contributed to organic growth.

Cash conversion Volati's target is to achieve a cash conversion rate in excess of 85% per year. At the end of the first quarter of 2017, the LTM adjusted cash conversion rate was 87%.

Capital structure: Volati's long-term target is for a net debt ratio of less than three times LTM adjusted EBITDA. At the close of the first quarter, Volati had a net cash reserve and therefore the ratio was negative 0.5.

Dividend policy: Volati's target for common shares is to distribute approximately 10–30% of the net earnings attributable to the Parent Company's shareholders. When assessing dividends, consideration is given to future acquisition potential, development potential in existing companies, the financial position and other factors deemed to be significant by Volati's Board of Directors. Dividends on preference shares are issued at an annual amount of SEK 40.00 per preference share, through quarterly payments of SEK 10.00. The proposed common share dividend is SEK 0.50 per common share, corresponding to 20% of the net profit for the period attributable to the Parent Company's owners.

Return on adjusted equity Volati's long-term target is a return on adjusted equity (calculated as average equity over the last four quarters) in excess of 20%. At the end of the first quarter, the return on adjusted equity was 17% as a result of the new share issue in conjunction with listing in autumn 2016.

1) Adjusted EBITA — refer to the definition in the note for alternative performance measures on page 24.

Consolidated financial trend.

+12% Net sales Q1, 2017

Net sales

In the first quarter, consolidated net sales amounted to SEK 743.6m (661.3), corresponding to a year-on-year increase of 12%. The growth was an effect of the acquisitions completed during the previous year as well as from organic growth. Acquired growth amounted to 7.6% and pertained mainly to the acquisitions of Miljöcenter and ClearCar. Organic growth increased sales in the first quarter by 3.7%, which was attributable to organic growth in all business areas. The exchange-rate effect was a positive 1.2%, as a result of the year-on-year strengthening of the NOK against the SEK in the first quarter.

+10% Organic EBITA growth Q1 2017

Earnings

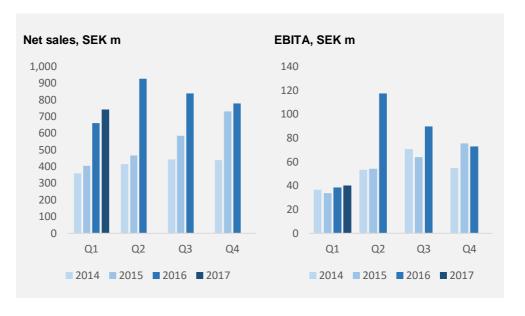

In the first quarter, EBITA amounted to SEK 40.1m (38.4). EBITA excluding items affecting comparability pertaining to the earn-out revaluation for Sörbö and listing expenses was SEK 43.0m (42.3) in the first quarter. Organic EBITA growth was 10.1% and mainly an effect of Besikta's positive trend in the first quarter from increased market shares. The exchange-rate effect was a positive 0.2%.

+59%
Net profit after tax
Q1 2017

In the first quarter, net profit after tax increased 59.1% to SEK 27.6m (17.4) as a result of lower financing costs after raising capital at the end of 2016. Net profit after tax attributable to the Parent Company's owners increased to SEK 27.7m (17.5) for the quarter. The minority share of earnings was a negative SEK 0.1m (neg: 0.1). Earnings per common share after deduction of preference share dividends amounted to SEK 0.15 (0.03)

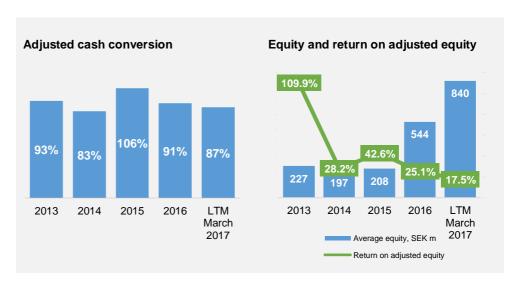

Seasonal variations

Volati's business areas operate in several different branches and markets. Overall, the Group is impacted by seasonal variations in terms of cash flow and earnings, where the fourth quarter generally has the strongest cash flow and the second and third quarters the strongest earnings, while the first quarter has the lowest cash flow and earnings. This means that Volati's operations, sales and earnings trends are best monitored on an LTM basis.

Cash flow

As a result of seasonal effects in most of the businesses, the first quarter is generally the weakest quarter in terms of cash flow for Volati. Cash flows from operating activities before changes in working capital amounted to SEK 41.2m (27.2) in the first quarter. Cash flows were negatively impacted by changes in working capital as a result of seasonal effects and the payment of invoices attributable to the listing in November 2016. Investments in non-current assets in the business units amounted to SEK 10.7m (8.2) and pertained primarily to ongoing investments in machinery and development of products and systems. Total cash flows for the first quarter of 2017 were a negative SEK 83.4m (neg: 39.6).

87% Adjusted cash conversion, LTM, Q1 2017 70% Equity ratio March 2017

Equity

Total equity for the Group amounted to SEK 2,263.6m (2,257.5) at the end of the period. During the year, equity attributable to the Parent Company's shareholders adjusted for preference share capital increased from SEK 1,411.7m at 31 December 2016 to SEK 1,418.1m at 31 March 2017. The equity ratio remained unchanged at 69.6% compared with the end of 2016. The new issue of common shares completed in November 2016 meant an increase in equity in parallel with a reduction in borrowing. At the end of the first quarter of 2017, the increase in equity meant that the average LTM return on adjusted equity was 17.5% (25.1%).

SEK 204m Net cash Q1 2017

Net debt

Following the new issue of common shares in November 2016, the external bank financing of SEK 973.8m was settled. At the end of the first quarter of 2017, the Group had net cash of SEK 203.5m compared with a net debt of SEK 264.5m at 31 December 2016. At the end of the quarter, total liabilities amounted to SEK 988.2m compared with SEK 985.7m at 31 December 2016. At the end of the first quarter, interest-bearing liabilities including pension provisions were SEK 104.8m compared with SEK 129.4m at 31 December 2016. At the end of the first quarter, the unutilised portion of the overdraft facility amounted to SEK 200.0m, the unutilised portion of the revolving credit facility was SEK 550.0m, and cash and cash equivalents totalled SEK 285.1m.

Net debt

As the Group had net cash of SEK 203.5m at the end of the quarter, net debt in relation to adjusted EBITDA amounted to a multiple of -0.48.

Acquisitions during and after the period

Acquisitions comprise a core element of Volati's strategy for creating long-term value growth and the company continuously evaluates complementary acquisitions and acquisitions in entirely new business areas. In Volati's assessment, risk levels with add-on acquisitions are lower than for acquisitions in new business areas, since in-depth industry know-how and an organisation for receiving the acquired company are already in place. As published in previous financial reports, Ettikettoprintcom entered into an asset transfer agreement in 2016 regarding the acquisition of a label printing business. Possession was taken in the first quarter of 2017. The operations in question were Etiketten, which reported sales of SEK 17m for the financial year ending in April 2016. The integration of Etiketten has gone smoothly and is expected to have a certain positive impact on sales and profitability for Ettikettoprintcom in 2017.

Volati's business areas.

Volati's 12 business units and some 40 operating companies are organised in three business areas: Trading, Consumer and Industry.

Breakdown of Volati's net sales and earnings by business area

For the 12-month period from April 2016–March 2017¹

1) The business areas' shares have not been calculated pro forma for the acquisitions carried out during the year, which is why the acquired operations in the above calculation are only included from the date possession was taken of the respective business and are calculated exclusive of central costs.

The Trading Business Area comprises six business units with some 15 operating companies in six countries. The business area focuses on three market segments: the building materials sector, home and garden, and agriculture and forestry. The business units under Trading have similar business models and customers, and are integrated through several functions and spheres of cooperation. Three business units share a logistics centre in Malmö, which enables coordination gains through the synchronisation of deliveries, flexibility in staffing schedules and cost advantages through bulk purchasing. Most of the operations also share an IT system, which allows for standardised processes and the coordination of purchases, support and service. Finance and other administrative functions are centrally coordinated, which generates cost advantages and the customer base shared between the business units enables cross sales, cooperation between sellers and the opportunity to offer integrated customer solutions. The business area manager is responsible for coordinating Volati's central support function and for supporting acquisition processes.

First-quarter net sales amounted to SEK 339.4m (295.8) and EBITA rose to SEK 13.9m (12.8). The majority of the business units increased their profitability year-on-year and earnings were also positively impacted by the acquisition of Miljöcenter. The integration of the acquired business units is continuing as planned.

	Jan-Mar 2017	Jan–Mar 2016	LTM	Full-year 2016
Net sales, SEK m	339.4	295.8	1,536.3	1,492.7
Organic net sales growth, %	3.3	39.8	3.9	15.5
EBITDA, SEK m	16.4	15.4	132.7	131.6
EBITA, SEK m	13.9	12.8	122.4	121.3
Organic EBITA growth, %	-3.9	neg.	0.7	-1.6
EBITA margin, %	4.1	4.3	8.0	8.1
EBIT, SEK m	12.5	11.6	116.9	115.9
ROCE excl. goodwill, %	36.2	26.5	36.2	41.1

The Consumer Business Area has three business units with a total of nine operating companies in five countries. The business units focus on various B2C niches and are driven by a combination of strong local entrepreneurship and cooperation in selected areas, such as database marketing, digitalisation and e-commerce. The business area manager is responsible for coordinating Volati's central support function and for supporting acquisition processes.

First-quarter net sales amounted to SEK 249.1m (216.4) and EBITA rose to SEK 28.0m (24.5). The increase was mainly attributable to operations at Besikta, which were positively impacted during the quarter by the stations acquired in 2016 through ClearCar.

	Jan–Mar 2017	Jan–Mar 2016	LTM	Full-year 2016
Net sales, SEK m	249.1	216.4	964.9	932.2
Organic net sales growth, %	4.0	-3.4	2.1	3.7
EBITDA, SEK m	35.9	30.5	173.0	167.7
EBITA, SEK m	28.0	24.5	141.1	137.6
Organic EBITA growth, %	34.9	-19.2	14.2	20.0
EBITA margin, %	11.2	11.3	14.6	14.8
EBIT, SEK m	25.3	22.1	130.2	127.0
ROCE excl. goodwill, %	199.6	196.5	199.6	196.1

The Industry Business Area comprises three business units with a total of 18 operating companies in 14 countries. The business area focuses on various B2B niches and is driven by the combination of strong local entrepreneurship with cooperation in selected areas, such as international expansion, lean manufacture and HR. The business area manager is responsible for coordinating Volati's central support function and for supporting acquisition processes.

First-quarter net sales amounted to SEK 155.1m (149.5) and EBITA rose to SEK 11.9m (15.0). The decrease in EBITA mainly pertained to lower sales for Corroventa where, unlike the first quarter of 2016, no major flooding occurred in Europe, which led to lower equipment leasing volumes. Ettikettoprintcom's profitability continued to trend favourably in the first quarter of 2017.

_	Jan–Mar 2017	Jan–Mar 2016	LTM	Full-year 2016
Net sales, SEK m	155.1	149.5	787.8	782.2

EBITDA, SEK m	18.5	21.3	158.1	161.0
EBITA, SEK m	11.9	15.0	132.0	135.1
Organic EBITA growth, %	-18.4	55.1	15.0	56.3
EBITA margin, %	7.7	10.0	16.8	17.3
EBIT, SEK m	11.5	14.7	130.6	133.8
ROCE excl. goodwill, %	77.2	54.1	77.2	79.1

Head office

Head Office comprises the central costs in the Parent Company Volati AB and associated operations including the acquisition costs or other non-operational items arising in the Group. In the first quarter, Head Office posted an EBITA of negative SEK 13.7m (neg: 13.9). During the first quarter, costs of SEK 2.9m (3.9) were charged to earnings and pertained primarily to earn-out revaluations and the listing of the common and preference shares on Nasdaq Stockholm.

Other information.

Share capital

Volati has two classes of shares, common shares and preference shares, which have been listed on Nasdaq Stockholm under the symbols VOLO and VOLO PREF respectively since 30 November 2016. At the end of the first quarter, the number of shareholders was 6,053.

The number of common shares outstanding was 80,406,571 and the number of preference shares outstanding was 1,603,774 at the end of the first quarter. The share capital amounted to SEK 10.3m at 31 March 2017. In addition, Volati has issued 4,174,570 warrants to senior executives, which carry entitlement to subscription for 834,914 common shares.

2017 Annual General Meeting

Volati AB's 2017 AGM will be held on 18 May 2017 at 4:00 p.m. at Nalen (the Stacken auditorium), David Bagares Gata 17, Stockholm. The doors to the auditorium will open at 3:45 p.m. Shareholders who wish to participate in the AGM should be registered in the shareholders' register maintained by Euroclear Sweden AB as of Friday, 12 May 2017, and notify their intent to attend to the company by Friday, 12 May 2017. Notice of attendance can be given by telephone +46 (0)8-21 68 40 on weekdays between 9:00 a.m. and 4;00 p.m., by e-mail to bolagsstamma@volati.se or through the company's website, www.volati.se.

Related-party transactions

No material transactions with related parties took place aside from those presented in the 2016 Annual Report. All related-party transactions were carried out at market rates. No other material transactions with related parties took place in the first quarter.

Events after the close of the reporting period.

No significant events took place after the end of the reporting period.

Notes to the consolidated accounts.

Note 1 Accounting policies

This interim report has been prepared in accordance with IAS 34. The accounting policies are based on the International Financial Reporting Standards as adopted by the EU. Furthermore, the appropriate provisions of the Swedish Annual Accounts Act have been applied. No significant changes have occurred in the accounting policies compared with the 2016 Annual Report. IFRS 15 — Revenue from Contracts with Customers comes into force on 1 January 2018. As of 31 March 2017, no quantitative estimates had been carried out, however Volati's assessment is that IFRS 15 will not have any material impact on the Group's accounts. This interim report for the Parent Company was prepared in accordance with the Swedish Annual Accounts Act and RFR 2 Accounting for Legal Entities. Some figures in this report have been rounded off, which means that certain tables do not always add up correctly. This applies where figures are stated in thousands, millions or billions. Pages 1–13 of this report comprise an integrated part of the interim report.

Note 2 Risks and uncertainties

A detailed description of the Group's material risks and uncertainties is provided in the 2016 Annual Report.

Note 3 Segment reporting

Volati is an industrial group comprising 12 business units, organised into three business areas: Trading, Industry and Consumer.

	Jan-Mar	Jan-Mar	LTM	Full-year
Net sales, SEK m	2017	2016		2016

Total EBIT	35.5	34.5	302.0	301.0

Note 4 Business and company acquisitions

In the first quarter of 2017, possession was taken of label printing assets that were acquired in the fourth quarter of 2016 through an asset transfer. Possession is not assessed as having any material impact on the Group's profit or loss or balance sheet.

Note 5 Alternative performance measures

The new guidelines from the European Securities and Markets Authority (ESMA) regarding alternative performance measures entered force from and including the 2016 financial year. Therefore, Volati is publishing an explanation of how these performance measures should be used, definitions and comparisons between the alternative performance measures and reporting in line with IFRS.

The financial reports published by Volati specify the alternative performance measures used, which supplement the metrics defined or specified in the applicable rules for financial reporting, such as revenue, profit or loss and earnings per share. Alternative performance measures are specified when they, in their context, provide clearer or more indepth data than those metrics defined in the applicable rules for financial reporting. The basis for alternative performance measures is that they must be used by management to assess financial performance and can thus be considered to give analysts and other stakeholders valuable information.

Volati regularly uses alternative performance measures as a complement to the key metrics that comprise generally accepted accounting policies. The alternative performance measures derive from Volati's consolidated accounts and do not comprise measures of financial performance or liquidity in accordance with IFRS and, accordingly, should not be considered as alternatives to net income, operating profit or other key metrics that are derived pursuant to IFRS or as an alternative to cash flow as a measure of consolidated liquidity.

The following table sets out definitions for Volati's key figures. The calculation of alternative performance measures is presented separately below.

Non-IFRS APMs and key metrics	Description	Reasoning
Organic growth in net sales	Calculated as net sales, adjusted for total acquired and divested net sales and currency effects, during the period compared with net sales in the year-earlier period, as if the business unit in question had been owned in the comparative period.	This metric is used by the management to monitor the underlying net sales growth in existing operations.
Adjusted net sales	This is calculated as net sales for the last 12-month period at the relevant reporting date for the companies included in the Group as of the reporting date, as if the companies had been owned for the past 12 months.	Together with adjusted EBITA, adjusted net sales and adjusted EBITDA provide management and investors with a picture of the size of the operations included in the Group at the reporting date.
EBITDA	Earnings before interest, tax, amortisation, depreciation and impairment.	Together with EBITA, EBITDA provides an image of the profit generated by operating activities.
Adjusted EBIT'DA	This is calculated as EBITDA for the relevant comparative period for the companies included in the Group at the reporting date, as if the companies had been owned for the relevant comparative period and adjusted for transaction-related costs, restructuring costs, remeasurements of earn-outs, capital gains/losses on the sale of operations and other revenue and costs deemed of a non-recurring nature.	Together with adjusted net sales and adjusted EBITA, adjusted EBITDA provides management and investors with a picture of the size of the operations included in the Group at the reporting date.
EBITA	Earnings before interest, tax and acquisition- related amortisations and write-downs.	Together with EBITDA, EBITA provides an image of the profit generated by operating activities.
Adjusted EBITA	This is calculated as adjusted EBITDA less acquisition-related amortisations and writedowns and impairment for the relevant comparative period for the companies included in the Group at the reporting date, as if the companies had been owned for the relevant comparative period.	Together with adjusted net sales and adjusted EBITDA, adjusted EBITA provides management and investors with a picture of the size of the operations included in the Group at the reporting date.
EBITA excl. items affecting comparability	This is calculated as EBITA adjusted for remeasurements of purchase considerations, capital gains/losses on the sale of operations and properties, and other revenue deemed of a non-recurring nature.	This is used by the management to monitor the underlying earnings growth of the Group.
EBITA excl. central costs and items affecting comparability	This is calculated as EBITA adjusted for central costs, remeasurements of purchase considerations, capital gains/losses on the sale of operations and properties, and other revenue and costs deemed of a non-recurring nature.	This is used by the management to monitor the underlying earnings growth of the operations in the Group.
Organic EBITA growth	Calculated as EBITA excluding central costs and items affecting comparability, adjusted for total acquired and divested EBITA and currency effects, during the period compared with EBITA excluding central costs and items affecting comparability in the year-earlier period, as if the business units in question had been owned in the comparative period.	This is used by the management to monitor the underlying earnings growth of existing operations.

Non-IFRS APMs and key metrics	Description	Reasoning
Return on equity	Net profit (including share attributable to non- controlling interests) divided by the weighted average of equity (including share attributable to non-controlling interests).	Shows the return generated on the total capital invested by all shareholders in the company.
Return on adjusted equity	Net profit (including share attributable to non- controlling interests) less the preference share dividend divided by the weighted average of equity for the last four quarters (including share attributable to non-controlling interests) less the preference share capital.	Shows the return generated on the common share capital invested by owners of common shares in the company.
Return on capital employed (ROCE)	Earnings before interest, tax and acquisition-related amortisations and write-downs excluding items affecting comparability for the last 12-month period in relation to average capital employed for the last 12-month period.	Shows the returns generated by the business area and the Group on capital employed without taking into consideration acquisition-related intangible assets with an indefinite useful life.
Return on capital employed including goodwill (ROCE incl. GW)	Earnings before interest, tax and acquisition-related amortisations and write-downs excluding items affecting comparability for the last 12-month period in relation to average capital employed including goodwill and other intangible assets with indefinite useful life for the last 12-month period.	Shows the returns generated by the business area and the Group on capital employed.
Equity ratio	Equity (including share attributable to non-controlling interests) as a percentage of total assets.	The key metric can be used to assess financial risk.
Cash conversion	Calculated as LTM operating cash flow divided by EBITDA.	Cash conversion is used by the management to monitor how efficiently the company is managing working capital and ongoing investments.
Adjusted cash conversion	Calculated as LTM adjusted operating cash flow divided by EBITDA.	Adjusted cash conversion is used by the management to monitor how efficiently the company is managing working capital and normalised ongoing investments.
Operating cash flow	Calculated as EBITDA less net investments in and divested tangible and intangible assets, and after adjustment for cash flows from changes in working capital.	The operating cash flow is used by the management to monitor cash flows generated by operating activities.
Adjusted operating cash flow	Calculated as operating cash flow excluding material investments of a non-recurring nature, such as development expenditure related to Besikta Bilprovning's IT system and listing costs.	The adjusted operating cash flow is used by the management to monitor normalised cash flows generated by operating activities.
Net debt/adjusted EBITDA	Closing net debt in relation to adjusted EBITDA for the period.	The key metric can be used to assess financial risk.

The calculation of alternative performance measures is presented separately below.
